THE UNIT.

COMPANY
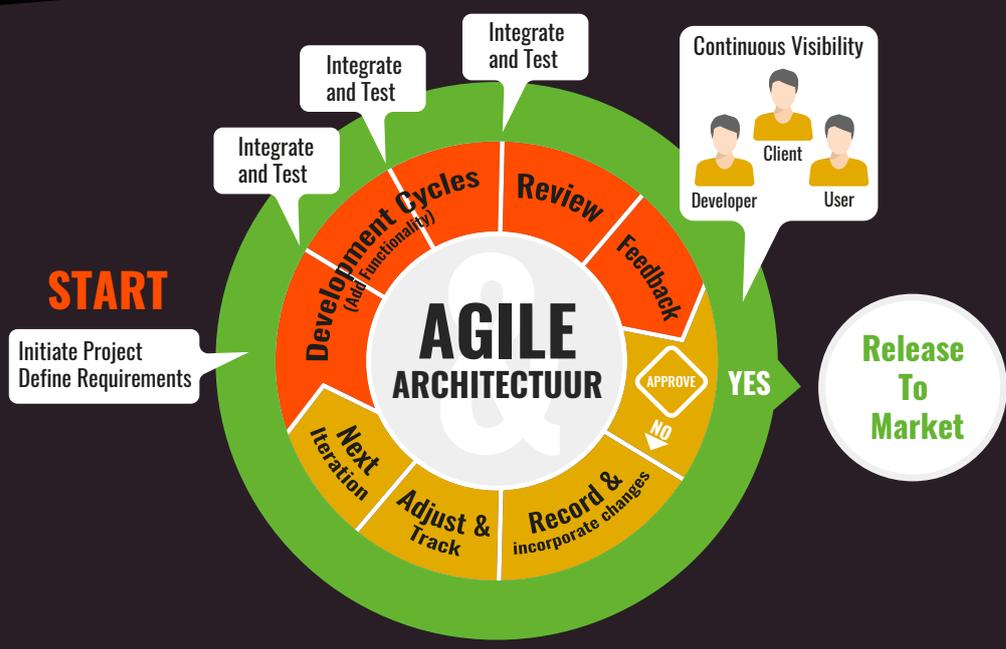

AGILE & ARCHITECTURE

Every organisation consists of architecture - processes, services and functions - that are linked to information systems such as applications, data objects and underlying infrastructure. How do you ensure that you can implement Agile changes, while linking mid-term and long-term together?

In other words: how do Agile and Architecture fit together? How do you prevent architecture from limiting Agile implementation or Agile from providing a suboptimal solution?

WHAT DOES IT SOLVE?

• How does Agile fit together with Architecture?

• How does TOGAF 9.1 framework fit together with SAFe Scaled Agile Framework?

• How do you combine an agile approach with an architectural approach for instance? How do they come together?

• How do you combine Epics, Features, Stories and Architecture Roadmaps, architecture building blocks (ABB) and solution building blocks (SBB)?

• Where do roles such as architect, product manager, business owner fit in?

• How does Project Management fit together with architecture, where does TOGAF fit in with Prince2?

• How do we execute project-driven architecture or architecture-driven projects?

✓ Managers

ABOUT THE UNIT COMPANY

The Unit Company is an accredited education institute with a focus on digital transformation, architecture and business innovation. We work for a number of universities, governments and companies, both nationally and internationally. Our courses are aimed at managers, consultants, specialists (SME), project leaders, and architects.

We provide class training experiences as well as in-company training. The courses are taught by our consultants, providing many practical examples and applicable knowledge. With their experiences gained directly from the workplace, they have become experts in their field. The Unit Company deliveres TOGAF® and Archimate® classroom courses, which are accredited by The Open Group. In addition, The United Company's courses are registered at the CRKBO (the Dutch Central Register for Short Vocational Training).

INCOMPANY TRAINING

Apart from monthly classroom training, a training program customised to your company is also possible. An in-company-training can be fully tailored to the needs of the client. Such customisable examples include: format, location, time and date, and duration. It is also possible to bring in your own examples.
